

Report for month of Jan.2017

During this month we have various activities keeping the objectives of the project in mind. We observed the change in people for taking lead and getting familiar with the various documents for the required for the essential certificates. There was also a need to help people to file the applications for the land documents, Housing scheme and also toilet scheme. Some have also taken the initiative to start the livelihood activities and were able to earn their bread in the village itself and avoid migration.

Education- Due to migration in the supplementary classes the attendance of the children is very low. For the present children we take different activities like drawing competition, essay writing, general knowledge etc. The present children were also motivated to go to school, and take the benefits of the mid day meal. The aganwadi also being visited and the food was supervised, it was notice that in some aganwadies food was not prepared according to the menu given by the ICDS department. (Integrated child development scheme). The complaint was file to the department.

Health:-The immunization programme was monitored by the animators.

The number of children and pregnant women who were immunized was.
