

Monthly Report of December 2017

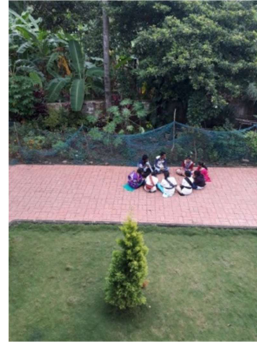

Peace is indescribable. You cannot bring it to life by force. It has to be made, or created skillfully by our efforts. It is a gift from Jesus. In this Christmas season we felt that we too are called to extent this message to all with whom we are associated with. We conducted various activities to spread this message to many more. We had 8 days NSS camp from a neighboring college in our premises, training program for SHG group, closing a SHG and distributing the money, Christmas program for the supplementary children and monthly meetings of SHG. Through all these activities we are trying to communicate the message of peace to all.

NSS Camp:

This was a new experience of being with these committed students for seven days in our campus. Fifty students and their professors from St. Joseph College Satpala came here for the NSS camp. By inaugurating it we communicated to them the value of living as a group by doing everything by them also extending their service to nearby villages. We told them that the remembrance of this camp will be an unforgettable one and it will support you to go forward effectively in your life. Both boys and girls were

really did their task well and we too got the opportunity to support them at different occasion also learn lessons from them.

SHG Training:

Since this group gone through a crisis period due to few members leaving the group and search for new members, we gave them few tips of how to go about with this new group. We stressed the point of leadership also the attitude each one need to take towards the other and common matters. We taught them through examples and stories.

Closing of a SHG and distributing the money.

A village fight lead the SHG to close down. We tried our best to bring them together but they do not want it. Few of its members joint in the other goup. We called all the members for the meeting and distributed the money.

Christmas celebration with Supplementary and other children:

Christmas is a celebration of Joy and Peace. This joy and peace is not belonged to few but needs to be shared with all. In the context of what is happening in our world today; we all look for peace in our hearts, families, and neighborhoods and in our countries. We realized that we all are called to be channels of God's peace.

On 26th we had the Christmas celebration with our Tribal children. Students from each village put up various cultural programs and everybody enjoyed it. Fr. Joe our parish priest gave them the Christmas message. We served them food also each one got a gift. Their joy and happiness filled our hearts with joy.

Christmas is Christmas only when we have the courage to gift the values of Jesus unconditionally to those who around us. This is the experience of ours during this month while animating different activities.
